

Corporate Profile

- Founded by technocrats having rich IT experience on global platform.
- Strong team of over 100 technical and business experts spanning in USA, Canada, and India.
- Our proven Global Service Delivery Model helps us to consistently deliver critical IT solutions with the fastest response time in the industry

Our Services

Software Development: With rapidly changing business environment and increased competitiveness, businesses need reliable technical partners who understand the needs and can deliver on your IT needs. IT Division with its vast experience and skilled team will help you build software to beat the competition, drive sales, and obtain maximum ROI. Our development expertise includes

- Product Development
- Application Development
- Enterprise Application Platform
- Application Maintenance and Support
- Mobile Application Development.

Software Testing: With rapidly changing business environment and increased competitiveness, businesses need to implement complex and dynamic solutions in less time and within limited resources. Our testing services help clients and business software users assure themselves that their software is fully functional and ready for go-live. Our testing methodology is well structured and easily adaptable; by introducing testing early in the SDLC we identify defects at very early stage. Our testing expertise includes

- Functional Testing
- Integration Testing
- Performance Testing
- Automation Testing

IT Staffing: With a strong team of highly skilled and talented IT consultants, IT Division is ever ready to assist with your staffing needs. With our regional and global network spanning in USA, Canada, and India has become the preferred "IT Destination" for our clients staffing needs.

Our Process Skills testing, technical interviews and reference-checking. Given some time up front we can surely provide you the ideal resource for 'Direct Hire Staffing', 'Contract Staffing', and 'Contract-to-Hire Staffing'.

Our Capabilities Global Delivery and Management IT Division has capability to provide staff augmentation services *On-Site, Near-Shore, and Off-shore* providing an engagement model for Global Delivery Ecosystem.
