Multi-billion dollar problem

Free and Fast shipping

Primary determinant whether somebody clicks buy
– most online retailers can't provide this

DIM weight

Space that a package occupies – most often what couriers use NOW to determine shipping charge for eCommerce

Online retailers don't dimension

Always weigh packages, but they don't dimension them – even though DIM weight is what is being used to calculate shipping fees!

$$\text{Dimensional Weight (lbs)} = (L \times W \times H) / 139$$

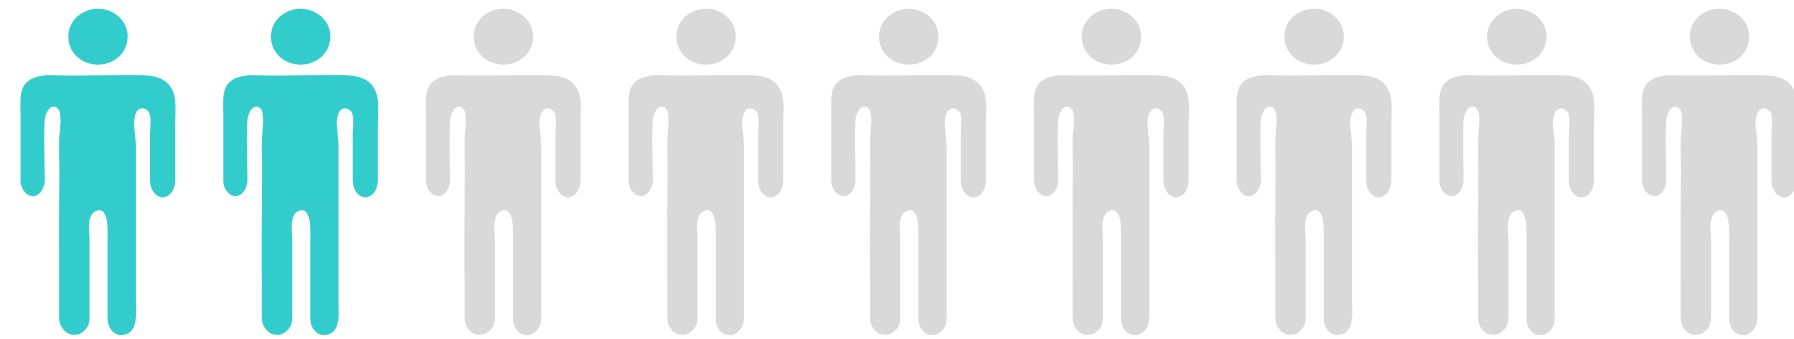

The Tricolops

Dimension any package instantly

- 01 Lighting Fast
- 02 Portable
- 03 Any Shape
- 04 Affordable
